Lakeland™ blocks have the sophisticated look of an old brick wall so popular with homeowners today. This tumbled, three piece system offers designers the opportunity and freedom to combine functionality with style. Lakeland blocks can be used to build random-pattern outdoor fireplaces, kitchens, islands, garden and seat walls, pillars, planters, and more.

**Base Preparation:** Base can be constructed of either poured slab or compacted gravel. See requirements below.

**Zoning and Permits:** Before you plan your project, learn about the necessary zoning requirements and rules for excavating and building in your area. No matter how small your project, be sure you obtain the necessary permits before you start construction.

**Concrete Base Foundation:**
- 6" deep
- 6" outside perimeter of Fireplace
- Reinforce with 6" x 6" no. 10 WWM
- Compact sub-base soils to 95% of standard proctor (ASTM D698)

**Aggregate Base Foundation:**
- 12" deep (minimum)
- 12" outside perimeter of fireplace
- Compact sub-base soils to 95% of standard proctor
- Compact aggregate base to 95% of standard proctor (ASTM D698)

**Know What’s Below:** Whether you are planning to do it yourself or hire a professional, smart digging means calling 811 before each job. Homeowners often make risky assumptions about whether or not they should get their utility lines marked, but every digging job requires a call— even small projects like planting trees and shrubs.
**Course 1**

S = Small Block

**Course 2**

**IMPORTANT:** Lay glue bead away from outside perimeter to prevent glue from squeezing out between courses.

**IMPORTANT:** Use adhesive on each course. Brush excessive dust from blocks to be glued.
Support for insert.

Course 3

Install fireplace insert when this course is finished.
**Course 4**

**Course 5**

36 x 7" Silver Creek accent piece can be glued now or at end of construction. Place as shown. Lift to glue in place.

*IMPORTANT: Courses are shown without fireplace insert. See page 5 for insert installation.*
Course 8

Course 9
Course 10

4 x 4 x 8" Cut Blocks (A).

Course 11

4 x 4 x 8" Cut Blocks (A).
**Course 12**

STOP

Add the spark suppressor to the chimney pipe and attach the pipe to the fireplace insert.

**Course 13**

Place 3" side of angle iron against cut block, center left to right. Lift to glue in place.
Course 14

Glue blocks to steel support.

Course 15
Course 16

Place and center Silver Creek tops as shown. Lift to glue in place.

Course 17

Position this course exactly above the course below. Lift each block to glue in place.
Course 18

Place and center Silver Creek tops as shown. Lift to glue in place.

Course 19
Course 24

Course 25
Course 26

Course 27

Place and center Silver Creek tops as shown. Lift to glue in place.
Final Step

Add spark suppressor cap.

If not already done, place 36 x 7" Silver Creek accent as shown. Lift to glue in place.

Allow 72 hrs. for adhesive to set before use.
No cutting, no guessing, no hassles – no problem®
